DETAILED ACTION

Claim Objections

1. Claims 5-8, 14-18, 24-28, & 34-38 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 20-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 20, line 1; claim 21, line 1; and claim 22, line 1, the term "the printer engine" lacks proper antecedent basis.

Claim Rejections - 35 USC § 101

4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

5. Claims 1-4 & 19-23, insofar as claims 20-23 are understood, are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 1-4 & 19-23 are drawn to functional descriptive material NOT claimed as residing on a computer readable medium.

Claims 1-4 are directed to a threshold matrix. Claims 19-23 (insofar as claims 20-23 are understood) are directed to a printer driver.

Allowable Subject Matter

6. Claims 9-13 & 29-33 are allowed.

7. The following is a statement of reasons for the indication of allowable subject matter:

Re claims 9 & 29 (and dependent claims 10-13 & 30-33), the art of record does not teach or suggest the recited gradation level processing while maintaining an identical keytone for all halftone levels.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Satoh et al discloses (paragraph 0124) a halftone arrangement in which keytone is preserved in lines.
